

5 minutes and queries the MeseFlow filters chasing new requests and tasks. The work of the robot on this queue is not invasive and does not interfere with the work of the CS FI team. All not-compliant

Q Search

### Data compliance checking

Routing request scope for robot

### • Existing active OC-routing found, OC SaaS included.

Supplierweb-routings are ignored.

- 003718953125.TEAPPS = OC Global Saas
- Two active routings found (a change is already timed to happen later) • checking for edira and site mess in laddress

OCALLIGA.TEAPPS.ALLIGATOR = OC FAO Saas

- LMC selected is not one of the accepted ones. See list below.
- Text in More information-field provided by customer • OVT does not start with 0037
- OVT shorter than 12 digits • OVT longer than 12 digits

• E-address is shorter than 12 digits

- E-address is longer than 18 digits • E-address does not start with either 0037, TE0037, or FI
- LMC selected is not on the list of approved LMCs (see other sheet) • Company name doesn't match with what is found in YTJ
- E-address starts with FI, is 18 digits long, checking iban-validation • If selected LMC is Tieto, but e-invoice address does not start with TE-prefix, the prefix is added. 003712345678 -> TE003712345678.

iAddress

Accepted LMCs, others are moved to manual handling. **CSP** name: **Local Message Carrier value in LMC**

#### Repository and setup The command line interface to iAddress information is available on leuku and offers following commands:

## > main script for single and mass orders

- > Routing requests adapters
- iban checking
- other Meseflow filters

## First stage, run initiation 04.2021 -->worknotes information only

Project automation stages

• collecting things to improve by CSFI or STDCH • some improvement to reduce queue workload- as much as possible (script,cron,queues,others)

- Second stage • May 2021, setting "CLOSE COMPLETE module" (Done cases with "High" priority)
- improvements some cases moved to manual handling. • Transfer knowledge about automation monitoring to STDCH (logs, script behaviours)
- Last stage • supporting automation,
- getting feedback from STD CHANGES about crucial changes which may affect the automation (ServiceNOW,A2A, changes, PROSPEKTI service problems etc.)

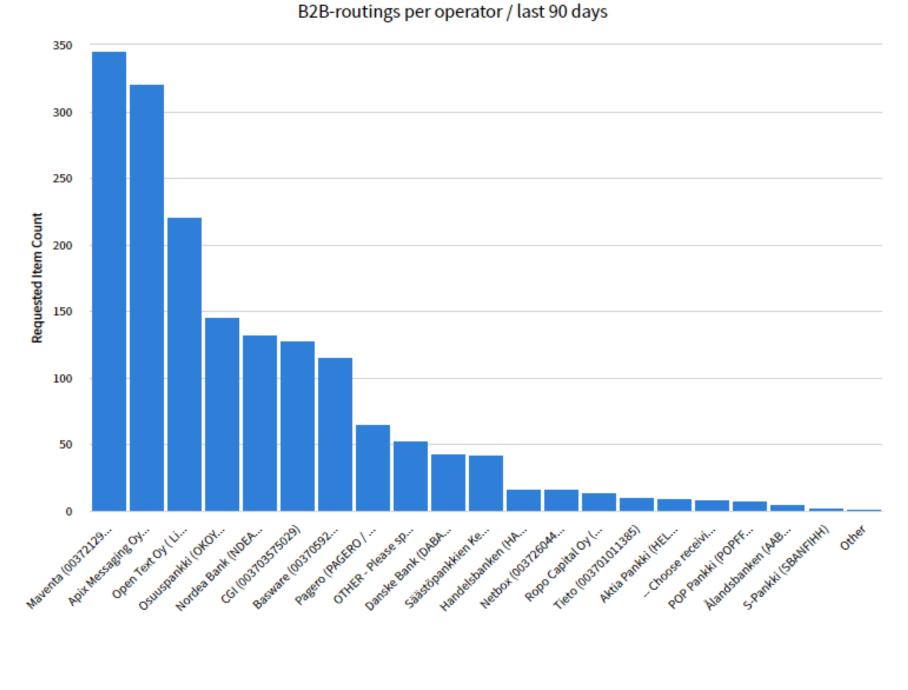

> moved to manual handling
